INFORMED CONSENT for Occupational Therapy care

I,
Benefits to be expected:
Although no assurance can be given and every case is individual, common benefits associated with regular participation in occupational therapy program include but are not limited to improvement in joint range of motion, muscle strength and flexibility, physical performance, body mechanics, decreased pain levels, reduction of future injury risk and prevention of various diseases. The primary goals and benefits of occupational therapy are to restore and maintain normal function and movement.
Risks and Discomforts:
As with any medical procedure or treatment there are risks. These include abnormal blood pressure, fainting, disorders of heart rhythm, excessive perspiration, and in very rare instances heart attack, stroke, or death. Every effort will be made to minimize those risks by the preliminary examination/evaluation and by observations during the therapy sessions. If you have any concerns or questions about any particular portion of the proposed treatment, please notify your occupational therapist and he or she will do everything in their scope to assist you.
Your Responsibility as a Patient:
To gain expected benefits you must give priority to regular attendance and adherence to prescribed amounts of intensity, duration, frequency, progression, and type of activity. To achieve the best possible results, report any unusual symptoms which you experience before, during, or after a occupational therapy treatment session.
I have read or have had read to me the above consent. By signing below, I agree to receive routine occupational therapy treatment as explained to me by the treating occupational therapist. My signature also attests to the fact that I have been given Patient's Rights and Responsibilities and the Notice of Privacy Practices. I intend this consent to cover the entire course of treatment for my present condition and for any future condition for which I shall seek treatment from Chestertown Physical Therapy, Inc.
